Regarding: 2012 Stormwater North Center Alley Project (\$92,589.20)

«GreetingLine»

A major project in the Village of Ashville is the intersection at State Route 752 and Long Street. Prior to that project we are working on enhancing the stormwater drainage. This will mean replacing and adding a stormwater line in Center Alley which is north of South Street. With this addition you have the option of connecting to this drainage system. The village will pay for the connection. Therefore, if you are interested please contact us so that a connection can be installed. From that connection you will be responsible to the line to your property.

The map below with the dash lines outlines the project area:

If you have additional questions contact the following:
