Regarding: Debt Service Charge for Water Resources Recovery Facility

Dear Neighbor:

In 2009, the Village of Ashville began a process to investigate the current wastewater facility. The purpose of this analysis was to determine the village's current and future need. The following occurred:

- August 2011 URS was selected from a field of 12 engineering firms to do that investigation
- April 2012 URS submitted their Report.

While the above process was taking place the OhioEPA instituted "Findings and Orders" These "Findings and Orders" indicate that the Village of Ashville will have to replace the facility or face substantial financial penalties. While we were working on the question of our wastewater facility, the OhioEPA removed the option to "Do Nothing".

- August 2012 it was decided from the report and the OhioEPA Findings and Orders to build a new plant in a different location.
- Village of Ashville obtaining a design and acquisition loan from Ohio Water Development Authority (OWDA) for 1.1 million dollars. At the time a "Debt Service Charge" was put in place for 69¢ per thousand gallons of water to repay that loan.
- July 2014 an agreement to purchase land was completed
- March 2015 a Permit to Install (PTI) and other permits were submitted to the OhioEPA. We are now at the construction phase of the facility.

The Planning and Design by AECOM, formally URS, indicated a total price for the Water Resource Recovery Facility is estimated to be 13.4 million dollars. This price may be reduced by the actual construction cost. The Village of Ashville needs to adjust the 69¢ charge. The sooner this takes place the less future adjustment will be necessary. Therefore, the enclosed Ordinance 2015-04 is before to Village Council. The charge will be adjusted to a rate of \$1.29 or a 60¢ increase.

Just to be clear, this will not be the last increase for the facility. The intent is to spread these increases over time. All the referenced above material can be found on our website [www.ashvilleohio.gov](http://www.ashvilleohio.gov) specifically on webpage <http://www.ashvilleohio.gov/index.php/utility-projects-wastewater-water>. Anytime you see the icon above you can click to find out about what is going on with this project. It is the largest project the Village has ever taken and we want to be open and transparent.

Yours Sincerely,

Franklin Christman, Village Administrator

Facebook & Twitter More Than a Social Media Tool

Social media is a quick and cost effective way to spread Village of Ashville news, events, tips, and more to followers in the community. Last month The Village of Ashville introduced two social media outlets to distribute its messages: Facebook and Twitter. As the Communication Specialist, the social media functionality is part of my responsibilities. With social media my goal is to increase citizen interaction with local government, get messages to the community, promote Ashville to surrounding communities and provide a quick and cost effective communication tool. Prior to joining social media platforms, Community Newsletter, was the primary communication tool used to reach citizens. The monthly newsletter is still one of the top ways

that citizens receive information from the Village because it is mailed to every resident and business address with their utility bill. However, the tool is an expensive way to keep the community informed. In addition, the only electronic platform used to distribute information was the Village website and calendar items, Public Notices, and RFP postings. **Twitter** Now, the page has 8+ followers simply through use of the platform. Tweeting takes less than 2 minutes, even with the addition of a photo. We would love to increase our followers! **Facebook** Facebook is currently our top social media networking site due to its more than 300 active users. Citizens can keep up on information relating to public

safety, new businesses, employment opportunities, and trending issues. The Village uses email to encourage employees to submit content for social media. As a result, employees regularly contact me to have their news and information distributed through social media. Social media is a quick, efficient, and low cost way to engage with the Village of Ashville communities. It only takes the click of a button for citizens to send a message, comment, like a post, or share to all of their followers. Social media is an essential tool that is being used to encourage positive community engagement. If there is something you would like to see on our Facebook and Twitter pages, please call me at 740-983-7171 or email me at adawson@ashvilleohio.gov.

Thank You, Andi Dawson

## Consumer Price Index (CPI) Results in 0.8% Utility Increase

In 2009, Village Council passed an Ordinance that would allow for a method to keep the cost of operating utilities in line with the fees associated with that utility. Ordinance 2009-03 indicates that after December, the Consumer Price Index (CPI) will be used to determine what is needed to maintain a rate schedule consistent with costs. That percentage is indicated to the right. The current percentage is 8% and will be reflected in the next

billing cycle. The impact of the rate change can be seen on the table to the right based upon a per 1000 gallons of usage. The Water Tower fee is not impacted by the CPI. Therefore, there is no adjustment.

A description of the CPI can be found at [www.ashvilleohio.gov](http://www.ashvilleohio.gov).

### Debt Service and Infiltration & Inflow (I & I)

In addition to the base rate there is an I & I fee for 34¢ and a debt services fee for 69¢ per thousand gallons of wastewater. The result of that can be seen in the table to the right. You can find more information about I & I and debt service on our website [ashvilleohio.gov](http://ashvilleohio.gov) and go to "Department –Utility".
