Facebook & Twitter More Than a Social Media Tool

Social media is a quick and cost effective way to spread Village of Ashville news, events, tips, and more to followers in the community. Last month The Village of Ashville introduced two social media outlets to distribute its messages: Facebook and Twitter. As the Communication Specialist, the social media functionality is part of my responsibilities. With social media my goal is to increase citizen interaction with local government, get messages to the community, promote Ashville to surrounding communities and provide a quick and cost effective communication tool. Prior to joining social media platforms, Community Newsletter, was the primary communication tool used to reach citizens. The monthly newsletter is still one of the top ways

that citizens receive information from the Village because it is mailed to every resident and business address with their utility bill. However, the tool is an expensive way to keep the community informed. In addition, the only electronic platform used to distribute information was the Village website and calendar items, Public Notices, and RFP postings. **Twitter** Now, the page has 8+ followers simply through use of the platform. Tweeting takes less than 2 minutes, even with the addition of a photo. We would love to increase our followers! **Facebook** Facebook is currently our top social media networking site due to its more than 300 active users. Citizens can keep up on information relating to public

safety, new businesses, employment opportunities, and trending issues. The Village uses email to encourage employees to submit content for social media. As a result, employees regularly contact me to have their news and information distributed through social media. Social media is a quick, efficient, and low cost way to engage with the Village of Ashville communities. It only takes the click of a button for citizens to send a message, comment, like a post, or share to all of their followers. Social media is an essential tool that is being used to encourage positive community engagement. If there is something you would like to see on our Facebook and Twitter pages, please call me at 740-983-7171 or email me at adawson@ashvilleohio.gov.

Consumer Price Index (CPI) Results in 0.8% Utility Increase

In 2009, Village Council passed an Ordinance that would allow for a method to keep the cost of operating utilities in line with the fees associated with that utility. Ordinance 2009-03 indicates that after December, the Consumer Price Index (CPI) will be used to determine what is needed to maintain a rate schedule consistent with costs. That percentage is indicated to the right. The current percentage is 8% and will be reflected in the next

billing cycle. The impact of the rate change can be seen on the table to the right based upon a per 1000 gallons of usage. The Water Tower fee is not impacted by the CPI. Therefore, there is no adjustment.

A description of the CPI can be found at www.ashvilleohio.gov.

Debt Service and Infiltration & Inflow (I & I)

In addition to the base rate there is an I & I fee for 34¢ and a debt services fee for 69¢ per thousand gallons of wastewater. The result of that can be seen in the table to the right. You can find more information about I & I and debt service on our website ashvilleohio.gov and go to "Department –Utility".
